Crestron Mobile Pro® G Native iPad™ App Supports Landscape Rotation and Gestures Navigation

Auto-Update for Top Grossing Lifestyle iPad™ App Available from the iTunes® App Store

The newest version of the Crestron iPad™ app is available from the iTunes® App Store, where it has been ranked the #1 Top Grossing Lifestyle App. This update includes landscape rotation and gestures navigation on the iPad for both Crestron and Prodigy® control systems. A beautiful graphic template with user-selectable backgrounds designed especially for the iPad is available free from the Crestron website, and there are also infinite possibilities for customization. Dealers can create their own branded designs and clients can enjoy the same look and feel on their iPad as on their Crestron touchpanels.

A control interface is only as powerful as the control system behind it; Crestron is the most powerful, flexible and reliable control system in the world. "The Crestron operating system is the core of home control, and our open platform lets you choose the interfaces you want," explains Vincent Bruno, Crestron Director of Marketing. "iPhones, Droids, PCs, Macs, touchpanels and iPads - there are no limits. We give you a consistent design and user experience on every device."

Using Wi-Fi locally or 3G network remotely you can access and control Crestron and Prodigy homes from anywhere on the planet. The ultimate mobile touchpanel puts control at your fingertips, all in real time and from anywhere. A version for Android™ is also available.
