

Crestron Intelligent Home at Beijing Majestic Mansion

Located in Beijing China, Majestic Mansion is an elegant and classic villa. Crestron control system is installed in this property providing intelligent home automation.

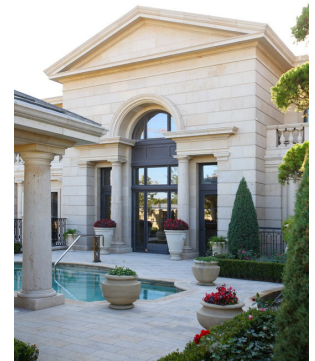

This beautiful villa is made up of reception rooms, living rooms, bedrooms, bathrooms, a study room, an outdoor swimming pool, a

games room, a home theatre and a large garden. This stunning villa reveals a wealth of impressive technological features including integrated lighting, shade, security and audiovisual control. The hi-tech specification and Crestron control system sets this property apart.

The Crestron system allows seamless control of the entire home automation system. Every audio, video and environmental element of the villa is integrated and accessible through the centralized system, powered by a core

PRO2 processor. All the AV and lighting systems are controlled via TPMC-8X and TPMCI-4X WiFi touchpanels located throughout the property. Householders could feel free to adjust drapes, lights, temperature, and audio/video components at any rooms via a single touch on the touchpanels.

A highlight of this villa is the home theatre in the basement. Wireless Crestron touchpanels control the impressive home theatre, which features top-of-the-line components including a screen, a projector, a DVD player, a switcher, an audio system and speakers. It boasts Adagio AESI home

audio distribution system, providing sophisticated audio signal routing, processing, and amplification for up to 6 rooms. Also, Adagio AAS audio server allows the home-owners to collect, manage and enjoy their entire digital movie and music collection, not just in the home theatre but throughout the property.
