

## Encore at Wynn Macau

Wynn Macau is a luxury integrated resort in Macau, offering gaming combined with a deluxe hotel, restaurants, designer shops, and spa. Wynn continues to raise the standard for luxury resorts in Macau with the opening of Encore Hotel, its all-suites boutique hotel.

Opened on April 22, Encore Hotel is an intimate hotel with a keen sense of elegance and playfulness. Accommodations at Encore include 410 suites and 4 villas that offer tasteful elegance in a comfortable, residential setting. Encore introduces two new restaurants, and Bar Cristal's jewel-box décor turns a classic lobby bar into a work of art. The Shopping Esplanade offers over 300 square meters of superbly designed retail space. Crestron integrated control system is installed in the Villas, VIP casinos, restaurants, and Spa of Encore Hotel.

### Villas

Savor the stunning views of Nam Van Lake from the intimate comfort; the apartment-like villas deliver uniquely Encore experience with advanced Crestron control systems. A PRO2 processor is used as the main processor to control all the AV gears in each villa; including LCD TVs, blu-ray players, DVD players, music server, amplifiers, and the lighting system. Adagio AMSI-AIP is installed for routing video and audio signals between Media Room, Master Suite, Guest Suite, Gym Room, Message Room, Dining Room, Kitchen and Study Room. Also, Crestron iPod docking CEN-IDOCV is provided for guests to play music and video from their own iPods. TPMC-8X and TPSI-6X wireless touchpanels; and TPS-6L and TPS-4L wall mount touchpanels provide seamless control over the systems of AV, lighting, background music and HVAC throughout the whole Villa.

## Restaurants

A proper environment should help reinforce the interior design and atmosphere. Lighting and background music certainly play an enormous role in creating such environment. Well designed lighting and suitable background music (BGM) allow for spaces to evolve, and can create different moods and scenes. Crestron provides a user-friendly control system for

restaurants of Café Encore and 99 Noodles, in order to monitor and control the lighting and BGM systems. A PRO2 control system is the “brain” of this integrated solution with every audio and lighting command easily accessible through TPS-6L wall mount touchpanel.

## The Spa at Encore

The Spa is an extraordinary oasis offering an exquisite experience with bespoke treatments in luxurious private therapy suites. At nearly 1,068 square meters, the extravagance of space is dramatic intimate by design. It provides eight luxurious suites including its own steam room, sauna, bath and shower. A TPSI-6X wireless touchpanel is installed in each suite; allowing users to monitor and control lighting, background music and HVAC systems no need to walk from room to room. Crestron control streamlines and simplifies all the sophisticated systems in the therapy suites, offering the ultimate lifestyle of comfort and convenience.
