## Crestron's Highlights at InfoComm Asia 2010

Only a few more days to InfoComm Asia 2010! It is our pleasure to invite you and present our innovative technologies and solutions.

Crestron's highlights at InfoComm Asia 2010:

- **Crestron on Apple**

A perfect technology fused with content and trend, controlling your multiple system anywhere with Macbook, iPod, iPhone and even iPad with just a single tap

- **Integrated Building Technology**

Single-platform solution that can monitor and control the disparate systems in commercial buildings, including room scheduling, AV presentation, lighting and climate control

- **DigitalMedia™ 8G**

The first ever 8 gigabit AV and control network distributes full HD with single wire technology that manages all the different digital and analog signals throughout the home, matching each source's output to the selected displays, providing the optimal output without signal scaling or compression.

- **All-In-One Presentation Solution**

A comprehensive control of presentation by small systems, QuickPacks and MPS, which are easy to use and simple to install

- **Residential Control and Theatre Solutions**

A solution with the use of Prodigy® and PROCISE™ that provides home automation and creates a completely immersive audio experience which truly let you indulge in entertainment
