

Successful Application of Crestron's Solution at the InterContinental Hotels & Resorts Foshan

Extraordinary Experience in Foshan

Located in the Guangdong High Tech Service Zone for Financial Institutions, InterContinental Hotels & Resorts Foshan is the first international luxury hotel in Nanhai District and the landmark of the area where people can truly indulge themselves with silent canal and greenery scenery.

InterContinental Hotels & Resorts Foshan features 445 luxurious rooms and suites, five specialty restaurants and bars, grand ballroom and a variety of leisure facilities integrating with the introverted charm of Foshan.

Being internationally reputed, InterContinental Hotels and Resorts Group has more than 60-years of experience in hotel management and operations and 164 hotels in 60 countries and regions. Excellent facilities, as well as attentive service are both critically important to InterContinental Hotels; therefore, they strive for perfection in providing guests with local custom and memorable travel experience. An advanced, powerful and stylish control system is the highlight of the facilities, that's why InterContinental Hotels chose Crestron undoubtedly.

Central Control System

The Crestron AV2 Series control system is the “brain” of this integrated AV solution in InterContinental Hotels & Resorts Foshan, accessing and controlling each audio, video, and environmental element. The Crestron 2-Series control system is unmatched for power, performance and scalability, achieving a strong central control, AV distribution system of an intelligent hotel.

Administrators can monitor the public area in the hotel by single touch of TPS-4000 10.4” touchpanel in the master control room. Compact TPMC-8X WiFi touchpanels in the guest rooms enable convenient and reliable wireless control, providing the hotel guests with the freedom of mobile, 2-way feedback and command of all entertainment, lighting, thermostats and security. The embedded PC engine allows lightning fast Internet browsing, streaming video and more from its 8” active matrix display

The Conference System

Equipped with Crestron intelligent central control system, InterContinental Hotels & Resorts Foshan has excellent conference facilities, as well as attentive service, which are mainly reflected in the ballroom and function rooms. The ballroom can accommodate 930 for cocktails and up to 630 people for a banquet. The spacious, versatile and well-equipped function rooms can also be extended to form larger spaces to suit any size group.

The boardroom and function halls offer complete finger-touch control of AV, lighting and conference system from wall-embedded Crestron TPS-6L touchpanels. Curtain, projection screen, lighting and audio can be mastered effortlessly with one-touch simplicity. Lowering the curtain, adjusting the light and audio automatically, a perfect environmental setting for a conference is easily achieved.

With the use of Crestron control systems, InterContinental Hotels & Resorts Foshan has not only provided their guests with an extraordinary and satisfactory stay in Foshan but also boosted their brand reputation.
