

Crestron

Award Winning Technology

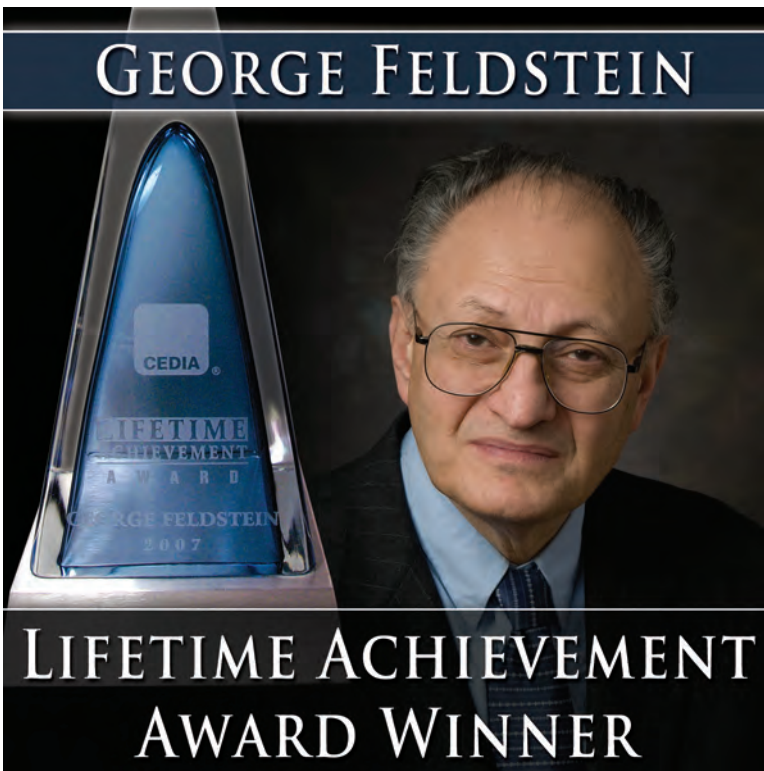

Crestron delivers the most advanced and reliable products in the world. Our commitment to excellence is anchored by state-of-the-art manufacturing operations and facilities.

Crestron world headquarters in Rockleigh, New Jersey spans six expansive buildings, including 400,000 square feet of manufacturing and warehouse space. The new state-of-the-art Research Center houses more than 350 full-time Crestron software and hardware engineers who are creating the next generation of technology.

Crestron is constantly improving processes to bring the best products to market faster than any other company.

Implementing the highest quality control standards ensures that every Crestron product has undergone the most intense and extensive testing procedures. All Crestron products receive UL, CE and FCC certification for home and office use. Crestron is also dedicated to the green initiative, providing the most energy efficient and environmentally safe systems on the planet.

As the global leader in advanced control and automation technology for commercial and residential applications, Crestron develops products and solutions that are RoHS compliant and conform to ASHRAE, LEED and California Title 24 standards.

CEDIA Electronic Lifestyles® Awards Lifetime Achievement Award

The Custom Electronic Design & Installation Association (CEDIA) awarded George Feldstein, President and CEO of Crestron Electronics, Inc. the CEDIA Lifetime Achievement Award. This prestigious award recognizes an individual who has exhibited outstanding, creative, innovative, and visionary leadership in the growth and advancement of the custom electronic systems industry.

Feldstein, who founded Crestron in 1969, was recognized for the exemplary contributions he has made during the course of his career, to Crestron and its employees worldwide, as well as the entire CEDIA community. From its humble beginnings, Feldstein has grown Crestron to encompass 57 offices worldwide.

Under Feldstein's direction, Crestron has pioneered cutting-edge innovations in the field of control and automation, including the VT Series, the first touchpanel to feature color, video and computer graphics; SmarTouch™, the world's first RF wireless control system; CNMSX-PRO, the first IP-based control system; and e-Control; the first Internet-based control technology.

The Crestron Eagles Program

The Crestron Eagles Program donates state-of-the-art home theater systems to military hospitals. The Eagles Program was conceived by George Feldstein, Crestron President, to provide comfort and entertainment for wounded service men and women returning from active duty in Iraq and Afghanistan.

While visiting Walter Reed and Camp Lejeune, Crestron Government Support Services Manager and Retired U.S. Marine Pete Baca was impressed by the optimism and determination of the wounded soldiers and marines. When they were not in physical therapy working hard to recover, they passed time in the lounge or recreation room before the Eagles program, which provided few amenities or comfort. Learning of the basic conditions in the lounges for these heroes and their families, Mr. Feldstein was immediately motivated to take action.

"I believe that every company in the private sector should do whatever they can to support and honor the men and women who have selflessly sacrificed so much to defend our country," said Mr. Feldstein.

As an active member of the ELF Foundation, which donates home theaters to Children's Hospitals, Mr. Feldstein was inspired to create the Crestron Eagles Program. The ELF Foundation has been a huge success, completing 70 "Rooms of Magic" in just seven years, and providing support to children with long-term illnesses and their families.

The Crestron Eagles Program was designed with care and empathy for our Wounded Warriors. "On all other American emblems the eagle faces to the right, which symbolizes power and strength," Feldstein explains. "This eagle faces left, which symbolizes compassion. Everyone has responsibility to give back to our service men and women who courageously made the ultimate sacrifice for our freedom and democracy."
