

Wildwood Barnes London

Corporate | **Residential** | Education | Government | Hospitality | Transportation | Health Care | Cultural and Event Centers | Commercial Lighting

A converted Victorian villa in a smart south west London suburb - you'd be forgiven in thinking that you'd seen it all before, but this is no ordinary property. Thanks to the efforts of developer Nick Bryant of Brybuild Ltd, architect Graham Massey of Creativemass and custom installer and CEDIA member, D&T.

Electronics, this house is now a stunningly conceived and expertly executed state of the art family home which boasts enough Crestron home automation technology to make it truly worthy of its place on exclusive Castelnau and amongst some of the most expensive addresses in Barnes.

The Crestron system allows seamless control of the entire home-automation demonstrating Crestron's extensive capabilities.

This beautiful home boasts seven bedrooms, six bathrooms, five reception rooms, an indoor swimming pool, a games room, a cinema and a large garden with views across London and of the nearby Wetlands Centre – but it's the hi-tech specification and Crestron management system that sets this property apart.

The Crestron system allows seamless control of the entire home automation set up from operation of the 2m, wide screen home cinema system, to multi-room audiovisual, programmed lighting and electronic blinds, interior and exterior CCTV, and door entry sub-systems.

This project demonstrates very well the extensive capabilities of Crestron kit. One of the other highlights of this stunning property is undoubtedly the 40-ft long, glass walled, weir pool and if you thought that electronics and water don't mix then think again – thanks to a sophisticated Biometric thumb-print door-entry system which restricts children from accessing the area unsupervised, parents can relax in the knowledge that the pool doesn't pose a risk to would-be water babes.

With its traditional kerb appeal and modern, hi-tech specification this property really is truly stunning both inside and out. In developing it Nick Bryant has applied a tried and tested formula, proving that where high end property development is concerned Crestron home automation really adds up!
